

## **Internships 2018**

### **Company Testimonials:**

“You don’t know what you’re missing if you *don’t* do it.”

Robyn Safron – Hydraforce

“An unexpected positive result of hosting an intern was the effect on my own employees rising up and teaching their craft which made them even better at their job. It is not a charitable effort, it is a good business decision for building the talent pool of our community.”

Greg Ohm – Bingaman Precision

“He is a super amazing student and he has been better than I could have dreamed of. He really hit the ground running and we are all impressed.”

Krystal Tudela – PM Mold

“They are both such impressive young women that I am teaching them things I don’t usually even teach to medical students, only residents!”

Dr. Brottman – Arlington Pediatrics

What a wonderful program for not only the d211 students but for the community to welcome in the future leaders of our world! Thank you for allowing us to be part of this wonderful program.

Mary Jo Shepherd LSW – Gigi’s Playhouse

“High School interns are the reason we have all of our social media.”

Shannon Olson - Owens Consulting Group

### **Student Testimonials:**

“I was able to learn and understand the processes that workers experience when developing projects and apply what I learned into a helpful and cooperative presentation of our group project as well as develop a sharper sense for public speaking.”

Motorola Intern

“I truly learned what pharmacists do which taught me more clearly what I wish to do in the future.”

Walgreens intern

“For students who plan to enter the Medical Field, this Internship is very important to understand if they are making the right decision. To become a doctor is a long and difficult road, and the student needs to comprehend if this is right for them or not. As for Arlington Pediatrics Ltd. it is an excellent place to have this exposure. It is a friendly environment. The nurses, doctors, and staff are very welcoming and open to explain their profession to students. Definitely during this Internship I learned a lot. I hope plenty of D211 prospective medical students will have the chance I had this summer to be part of this excellent internship.”

Arlington Pediatrics Intern

“I learned specific skills related to this industry to include on a resume, and gained experiences you can speak about in a job interview.”

IT Experts Intern

“Everyone at Bingaman is going to help you learn and be the best you can be. They go above and beyond by showing you everything the company does. Allows you to experience and work on projects. They let you give your input and help the way you think is best. They put lots of trust and treat their interns very well. I highly recommend this place.”

Bingaman Precision Intern

“There was never a day that I didn’t feel welcome at HydraForce. From the engineers, to HR to the maintenance staff, everyone welcomed us with open arms and talked to us as real employees, not just recent high school graduates with no work experience. They were always there to teach us if we didn’t know and I never felt like we were being frowned upon.”

Hydraforce Intern

“I had a great time handling food and being involved in the process on making the food. I was able to learn what goes on behind the scenes at food catering places and I was always amazed by the quantity of the materials we used. I was involved in working at the sandwich line, fruit section, pastry making, and even the grill station. There were such a variety of things that went on the kitchen and I had such a great time being a part of it. I also enjoyed talking to the chefs and by the end of my internship, I was able to build a strong connection with them and they even told me to come back anytime I wanted.”

Tasty Catering Intern
